

We provide internships on electric vehicles such as bikes, moped and cycle. We guide every process from theoretical, manufacturing and assembly.

A batch usually consists of 12 to 16 members and as a group they will perform every procedure in making of electric vehicle.

The process involves understanding the design, chasi making and assembly.

A day in a week course is divided into two parts where

Each part is focused on theoretical and practical to ensure that our students can get knowledge of the both Parts theory and practical which follows the exact procedure.

Courses Offered :

We offer multiple courses depending on the student interest.

- Electric Moped Internship.
- Electric Moped Manufacturing Internship.
- Electric Bike Internship.
- Electric Bike Manufacturing Internship.
- Electric Cycle Internship.
- Electric Cycle Manufacturing Internship.

In the electric Bike Internship we provide theoretical knowledge and teaching our students the technicalities of the electric bike.

In the electric Bike manufacturing internship students will have theoretical knowledge as well as hands-on experience of manufacturing a bike. Few of the topics students will be covering in this internship programme which will give our students new skills and experience.

Skill Sets

- Design Analysis
- Measuring
- Cutting
- Grinding
- Hammering
- Assembling
- Electricals
- Analysis of ECU Kit
- Analysis of wiring setup
- Vehicle Analysis
